

Equifax
PO Box 740241
Atlanta, GA 30374

Dear Customer Service Representative:

IQ DATA INT IQD0AVE1938467990:

You are showing fraudulent collection information on my credit report. I paid in full with the original creditor before any collection activity so it never became a collection. I have no idea why you are reporting this on my credit report. I am formally disputing your reporting. Collection agencies cannot just report collections on a person's credit when there is no money owed!

Please provide to me the following information:

Name and address of the original creditor

Exact name of listed account holder

The date this account was first delinquent with the original creditor

The date of last activity for this account with the original creditor

The name, address and phone number of the person who provided the above information to you

PRIME GROUP HOLDINGS LLC 18006902:

Equifax is reporting information on my credit report which I do not recognize. I contacted the company directly and they were unable to find any information regarding the account they are reporting. I don't understand why they can't find information for information that *they* are reporting, but they told me to contact the credit bureaus.

This information must belong to someone else; maybe someone with a similar name or social security number? I only know that **it is not mine**. I just recently sent to you my current identity documentation to update my personal information on my report so you should be able to clearly identify that the information does not belong to me.

CREDIT COLL 68525618:

The following account is reporting inaccurately. The account status should not be a collection and there should be no balance because it was paid. Trans Union isn't even reporting the date that the account first went delinquent - what is that date? I believe this account has been re-aged by CREDIT COLL.

Please provide me an updated credit report with the corrected information. Your expeditious response to this request is appreciated.

Sincerely,
